

Iliane Borge

Objective

Join a dynamic team as a web developer or web engineer.

Professional Summary

I have international experience as an IT professional with emphasis in Web Engineering, Voice Technologies, Networking and Marketing. I bring over 5 years of hands on training as well as progressive and diverse experience in the professional IT environment and marketing business. I use system management disciplines and business processes on a daily base. With good understanding of business, IT architecture and programming concepts I gained a reputation for delivering high quality in a time intensive environment. I have used my fluency in German to assist the IBM PartnerWorld team in delivering web content to German business partners. I am also proficient in Spanish and French. I am an engaged team player with motivation to grow in the industry.

Professional experience

2004 – Present time: IBM PartnerWorld Group – Web Developer

I am creating, updating and administrating IBM PartnerWorld Internet pages worldwide in English and other world languages in a Lotus Notes content management environment as well as an online JSP content management system. I am working on HTML, XML and JSP pages that include JavaScript.

Furthermore I am responsible for the monthly web statistics report which is been delivered to IBM content owners worldwide.

I also support trouble tickets for IBM business partner and IBM content owner worldwide who encounter entitlement or content issues.

2003 – Present time: Self employed – Web Engineer and IT Architect

I provide complete IT solutions with Internet Presence, Multimedia designs, Server Administration, Network Administration, IT Infrastructure consulting and Web Hosting for home users and small business

I develop Internet sites with HTML, PHP, MySQL database, JavaScript, and Java Applets. The pages include shopping cards with credit card payment, email templates, slide shows, sessions with login and upload scripts for registered users, upload of multimedia objects, animated GIFs, SVG, iFrames, newsletters, guest books and forums. The Internet pages are hosted on a ESX Server running Linux Suse 9.2.

Please see some examples of my work at www.e-horse.biz – www.eventpictures.biz – www.sporhorsesoftexas.com – www.dieborges.com.

I am also responsible for the server administration. This includes installation, configuration and administration of databases, Apache web servers running on Linux Suse 9.2, SMTP using sendmail, and FTP Servers. Web statistic reports are provided to clients to optimize the web sites to individual needs.

I support and maintain IT infrastructures of home users and small business.

I offer marketing solutions including animations designed with Macromedia Flash, graphical objects created in Macromedia Freehand or Macromedia Fireworks, Video editing and DVD creation in Pinnacle Studio, Adobe Premier and NeroVision, and printed advertisement created in MS Publisher.

2000 – 2003: IBM Germany – Voice Technologies, Marketing, Web Development, Sales & Networks

Voice Technologies:

Thesis: “Speech recognition for a broadcasting system in order to automatically provide keywords, and meta-data”

The thesis has been accomplished with Jutel RadioMan, IBM ViaVoice and its SDK. It includes software engineering, testing and documentation as well as a scientific research in the field of voice technologies with emphasis on speech recognition.

Marketing:

Development and design of an advertisement booklet for the Media & Entertainment department at SerCon with emphasis on small and medium sized businesses as target groups.

Web Development:

Design and development of the Low Power Intranet Pages for the IBM Austin Research Lab. This work included creation of project pages for the different research groups and the development of upload scripts for multimedia presentations.

Sales & Networks:

Assistant of the IBM sales representative responsible for UPS, Kuehne & Nagle, and Hapag Lloyd worldwide.

Research and documentation to a VPN project. The customer Hapag Lloyd was looking for a technology that allowed him to access an internal database remotely.

Technical Skills

Web Development:

Installation and configuration of RedHat and Suse Linux with Apache Web Server, MySQL Database and FTP Server. Implementation of Internet Presences for small businesses with PHP, HTML, SQL, JavaScript, Java Applets, SVGs, Streaming Media and Multimedia techniques like Macromedia Flash, Video and Audio.

Databases:

DB2, MySQL, Lotus Notes
